NATURE NEEDS HEROES™

EMEA FOOTWEAR S/S20

NATURE

NEEDS

HEROES™

Last season, we asked ourselves “what if?” What if the world was full of lush trees and green neighborhoods? What if we could motivate hardworking people around the world to step up and build a greener future? What if we could do more as a company and a brand? We responded, “why not?”

Now more than ever, Nature Needs Heroes. REAL PEOPLE. REAL HEROES™. Those taking action—big and small—to make lasting change. This spring, we follow these heroes, supporting them as they plant urban gardens, promote solar energy, influence others through environmental activism and do what they do to create real change. We equip them with products that are innovative, stylish and focused on minimizing our impact on the environment.

Around the world, the use of plastic water bottles is on the rise. Billions of them are collected from landfills, recycled and turned into durable ReBOTL™ material that we use to make products. Similarly, we take waste rubber left over from manufacturing and turn it into recycled rubber soles that deliver traction, durability and eco-consciousness.

We invite you to become a hero for nature with us by simply choosing recycled and durable Timberland® products. This spring, we can all be heroes.

REBOTL™

REUSE. RECYCLED. RETHINK. REBOTL.

ReBOTL™ material contains at least 50% recycled plastic. Around the world, the use of plastic water bottles is on the rise. And as a result, so are the trash heaps. But thanks to some forward-thinking people, billions of bottles across the globe are collected, recycled and turned into durable RPET yarns (that's Recycled Polyethylene Terephthalate, to get scientific) that we then use to make products. This process is great for business and supports jobs, too.

- Non-biodegradable PET plastic bottles are collected, shredded and recycled into material
- This material is used in footwear uppers and linings; and bag and outerwear shells and linings
- Material contains at least 50% recycled PET
- So far, over 445 metric tons of plastic waste has found new life in our products: in 2018 alone, over 45 metric tons.

TRUECLOUD™

COMFORT FOAM

LIKE WALKING ON A CLOUD—TRULY.

Our new footbed delivers instant cushioned comfort that helps you stay comfortable all day long. The TrueCloud™ comfort foam has a pillow-like feel as soon as you put your foot inside the shoe. It's lightweight and provides great cushioning that lasts and lasts.

Instant comfort
Lightweight
Long-lasting cushioning

A photograph of a dense forest with tall, thin trees and a thick carpet of green undergrowth. Sunlight filters through the canopy, creating a warm, golden glow. The text 'MEN'S CASUAL' is overlaid in white, bold, sans-serif font, underlined with a thin orange line.
