# BUILDING THE GOOD TRAIL

Garmont was built on a passion for the outdoors and a love of adventure. As an outdoor-loving company dedicated to developing product for the outdoor consumer, we are particularly mindful of the importance of social responsibility and the conscientious use of resources. Through our work processes, best practices, policies and products, we place attention on the impact of our actions both on our environment and on our community.

Our headquarters and warehouses are powered with renewable energy sources. We have strengthened the digital assets we provide our markets in order to reduce the quantity of print materials developed each year. When we do print, we favour FSC certified paper and eco-friendly inks. We strive to reduce waste, recycle as much as possible and turn waste into resources where possible.

We are strongly committed to the design and development of products that last for years. This long term perspective requires developing products that meet both the needs of today and of tomorrow. In the design and development of new or updated projects, we look for high-performance solutions and materials that combine quality and durability with a reduced environmental impact. A first example in this direction is the 9.81 N.Air.G 2.0 collection in which the mesh fabric upper uses certified ECONYL® regenerated nylon from waste such as fishing nets abandoned in the oceans and other nylon waste.

We partner with the Global Conservation Corps (GCC), a non-profit organization in South Africa whose mission is to conserve wildlife through empowering and educating people. Bringing people back to nature is a key element to creating a sustainable future. The real difference lies in empowering people through education, development and training.

If we work together, the impact of these changes can be even stronger. Help us to make the difference. Use these workbooks responsibly, favouring the digital version whenever possible. And at the end of their lifecycle, be sure to recycle appropriately.

Because together we can make a difference and help leave the world a better place for the future generations.

MICHELIN®  
OFF ROAD

A: FrameFlex Mid insole  
B: Dual Density EVA midsole  
C: Michelin® Off Road outsole

Dedicated to the active outdoor enthusiast looking for maximum performance in a lightweight and versatile boot. The suede leather upper is durable, equipped with GORE-TEX® Extended Comfort technology for versatile climate comfort. The Michelin® double-compound outsole uses a specific compound for climbing in the toe area. Ideal for via ferrata, technical approach and alpine trekking on mixed terrain, rock or scree.

PROTECTION	▲ ▲ ▲ ▲ ▲ ▲ ▲ ▲

SUPPORT	▲ ▲ ▲ ▲ ▲ ▲ ▲ ▲
STIFFNESS	▲ ▲ ▲ ▲ ▲ ▲ ▲ ▲
BREATHABILITY	▲ ▲ ▲ ▲ ▲ ▲ ▲ ▲

- New last that combines a wrapped fit with enough forefoot volume to ensure maximum comfort without sacrificing precision even on the most technical routes.
- 1.6 mm suede leather upper with ultralight foam inserts on the toe box and heel area for added protection. Foam is an innovative material that guarantees not only excellent mechanical performance, but also considerable elasticity and flexibility and does not contain pollutants such as DMF or PVC.
- GORE-TEX® Extended Comfort for optimized climate comfort in warmer conditions and during higher activity levels.
- Heel Lock to fix the heel in the heel pocket and help prevent heel slip.
- Lace to toe closure for better climbing performance and a customised fit.
- Eco-friendly Ortholite® UltraLite™ footbed featuring a combined structure: a rigid and stable compound in the heel area and an ultralite soft cushioning compound in the central and forefoot area.
- FrameFlex Mid insole offers the appropriate blend of stability and stiffness to tackle challenging routes in total comfort
- Michelin® Off Road double-compound outsole with improved toe grip and greater traction underfoot. The tread design, with Fiber Lite inserts, offers lightness, flexibility and traction for excellent performance in all situations.

MICHELIN®  
Free Cross

A: TPU heel support for stability.  
B: Expanded EVA midsole.  
C: Michelin® Free Cross outsole

Breathable and lightweight shoe designed for fast-paced activities both on- and off-trail thanks to the Michelin® Free Cross outsole with differentiated lugs for optimal grip on mixed terrain.

The sublimated mesh fabric upper uses certified ECONYL® regenerated nylon from waste such as fishing nets abandoned in the oceans and other nylon waste.

PROTECTION	▲ ▲ ▲ ▲ ▲
LIGHTNESS	▲ ▲ ▲ ▲ ▲
SUPPORT	▲ ▲ ▲ ▲ ▲
STIFFNESS	▲ ▲ ▲ ▲ ▲
BREATHABILITY	▲ ▲ ▲ ▲ ▲

- Sublimated air mesh fabric upper for enhanced breathability. Fabric made with ECONYL® regenerated nylon, a special and durable nylon yarn. Seamless TPU inserts provide protection and structure.

- Expanded EVA midsole with a ventilation grid for enhanced breathability, also downwards through the midsole.

- TPU heel stabilizer provides support and balances weight.

- Michelin® Free Cross outsole with deep and aggressive lugs for superb grip and enhanced ground control.

**ECONYL®**

ECONYL® **regenerated nylon** is made from waste such as fishing nets from the oceans and aquaculture, fabric scraps from mills and carpets destined for landfill.

It is exactly the same as virgin nylon and **can be recycled infinitely without ever losing its quality.**

**The choice of ECONYL® actively contributes to the reduction of global warming by up to 87% compared to the use of virgin nylon yarn.**

The use of ECONYL® also makes it possible to reduce the use of non-renewable energy resources by 44%.

## STEP 1: WASTE

## STEP 2: POLYMER

## STEP 3: YARN

## GTF™

Our family of soles.

We studied each sole to offer you the most suitable characteristics for the specific context of use.

### GTF™ DIAMANTE

A sole that combines all the characteristics essential for approach but that delivers a high level of comfort even on long hikes.

- High-performance, technical and grippy outsole.
- Wedge-shaped lugs are directionally placed to increase traction.
- Special climbing zone in the toe area enhanced control and stability.
- Bi-density EVA midsole delivers optimal cushioning.

### GTF™ OPALE

Suitable to different types of terrain, this versatile sole is exceptionally lightweight and with excellent shock absorbing properties.

- Lugs have been studied to provide push off and traction on grass, gravel and dirt.
- Low-density EVA core provides cushioning and high level of comfort.
- A special shank in the arc area supports the foot.
- This sole is equipped with A.C.E. technology (Advance - Cushion - Enhancer).
